ENVIRONMENTAL POLICY

PRISMA INDUSTRIALE S.r.l. believes that environmental protection is a value to be pursued constantly with the awareness of the growing community's attention towards environmental issues and sustainable development.

Hereby, PRISMA INDUSTRIALE S.r.l. wants to point out its commitment to the protection of the environment and define a guide to implement and improve its environmental management system.

PRISMA INDUSTRIALE S.r.l., aware of the environmental impacts caused by its activities, products or services, recognizes environmental protection as its strategic goal, to keep in constant attention while exercising all the activities carried out directly or through its suppliers.

PRISMA INDUSTRIALE S.r.l., adopting an Environmental Management System, is committed to operating in a manner consistent with all existing legislation concerning environmental protection and pursues continuous improvement of its performance, preventing pollution and minimizing, where technically possible and economically feasible, the negative impacts on the environment arising from its activities.

The primary objectives that the company has set in this area are:

- To support the conservation of natural resources with actions to an effective and efficient use of energy
- To contain the production of waste and improve the management
- To ensure that all personnel is aware, responsible and involved in the efforts of the company in the management of environmental issues related to carried out activities
- To monitor its own environmental issues, also in order to prove the validity of the improvements implemented to reduce the negative environmental impacts related to its activities
- To identify and apply appropriate instruments to influence the attitudes and environmental performance of suppliers and contractors
- To use increasingly eco- friendly materials and processes.
